*** Berthing time in Hong Kong could be affected by port congestion or delays beyond ONE's control*

In China, the humble cherry has become a status symbol, with millennials even coining the term “Cherry Freedom”, defined as having the means to purchase this luxury fruit without having second thoughts. While once considered a fruit only to be eaten by Chinese aristocrats, the advances of global trade and technology has allowed greater access to this fruit for more people to enjoy.

This deliciously sweet red fruit is also considered a symbol of good fortune and prosperity thanks to its luscious red colour and round shape, and is highly coveted by many to be given as gifts to loved ones during the Chinese New Year period – perfect timing as the Chilean cherry season starts in November. Chilean cherries are highly sought after thanks to their superior quality and taste, and a mature and stable supply chain has helped Chilean cherries gain a foothold in China.

The export growth estimations for this season are ranging between 3-5% and reaching up to 373,000 tons, of which China will continue as the main destination. Cherries do not have a long shelf life and are prone to damage if there are delays in transport, hence the time sensitive nature raises the need for fast and reliable transport which is key to ensure that the fruit arrives in the best possible condition

To meet this need, ONE has implemented a temporary change in port rotation and faster sailing speed, thus demonstrating its commitment to the perishable produce industry and flexibility to adapt to new challenges by providing innovative solutions.
